

October 2009

Skurrays team up with Kindertons to offer accident support.

Skurrays, the Wiltshire based dealer group, is pleased to announce the launch of an Accident Management Scheme. The new scheme is open to all its customers and offers nationwide assistance in the event of them being involved in a road traffic accident.

Customers will be provided with a dedicated 24 hour helpline (08452 932572), which entitles them to roadside assistance regardless of the circumstances of the accident but will ensure that they'll be on the road to recovery with the minimum of fuss.

The scheme will be administered by Kindertons, a nationally recognised Accident Management Company, who offers the service through their nationwide recovery network.

Nick Plevey, Group Managing Director, of Skurrays added "This is an exciting new venture for our two companies. We're delighted to be able to offer this new Accident Management service as it offers our customers peace of mind should the worst happen.

"It couldn't be more simple, there's just one number to call, there's no charge for the service and we'll oversee your claim from start to finish. The service is designed to minimise the stress and inconvenience any accident inevitably causes. "as servicing and selling vehicles we like to be able to offer the complete package and this acquisition allows us to do so."
